

FOR IMMEDIATE RELEASE

HOLASE Incorporated Launches in Newmarket, NH

Newmarket, New Hampshire, May 13, 2009 – Holase Incorporated is an early stage technology company that is focused on delivering easy to use innovative and secure wireless products that are designed specifically for Homeland Security, Public Safety, and First Respondent market segments.

Led by an experienced entrepreneur, Evan J. Bontemps as its President and CEO, Holase established its operations in Newmarket, NH. The company is currently engaged with police and public works departments for beta product testing. Holase plans to continue the product testing programs with select law enforcement and public works agencies for several more months, with plans to introduce commercially available products in Q3/2009.

Among the company’s leadership is Thomas F. Terrien, Jr. who leads the engineering efforts at Holase as the Vice President of Engineering. Mr. Terrien has been a core founding member in numerous early stage start-ups in New Hampshire and in Massachusetts.

About Holase

Incorporated in February 2009, Holase Incorporated develops, markets, and sells secure wireless technologies to build advanced information networks that enable its customers to intelligently manage and secure their environments. Holase conceived innovative, unique, and patent pending product architectures that are unrivaled and unparalleled in their targeted industries. The products are designed to serve the Homeland Security and Public Safety Industries, including Healthcare Safety. Holase Incorporated is privately held and is headquartered in Newmarket, NH.
